

District Technology Hardware Standards

The District is into the third year of our Simplification Initiative. This initiative was driven by the need to increase computer system reliability and reduced support costs. As a result the District has adopted a standard that changes the direction of both the infrastructure and client computer architecture. All future acquisitions will be complying with the standards where ever possible. The following are the standards by Category:

Servers

Windows Based HP

Network and Associated Applications

Microsoft Server ; MS SQL; MS Exchange; CISCO Routers/Switches/Wireless Access Points
