

Forward all calls to either voicemail or another phone:

Press the CFrwd button on your phone. You may need to press the large arrow button to move to screen 2 of your display to find it. This will start the speaker button on your phone and give you dial tone. Dial voicemail 1600 or another phone number you wish to send your calls to then hang up or press your speaker button. Notice that a triangle will appear next to the CFrwd button as a visual notification. Your phone will ring only once as a reminder while it is in forward. To turn off call forward just find the CFrwd button and press the triangle will disappear and forwarding will be turned off.
