

Read and try to solve the problem below.

How can you show 10 with counters?

Try It

Math Toolkit

- counters
- crayons

?

?

10

Apply It

1 What are three different ways to make 9?

?

?

9

?

?

9

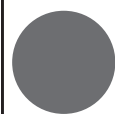

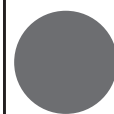

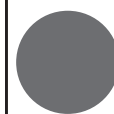

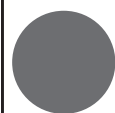

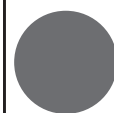

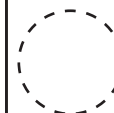

?

?

9

**Draw counters to finish each picture so it shows 10.
Write how many counters of each color.**

Example

?

9

?

1

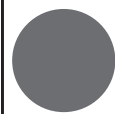

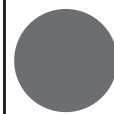

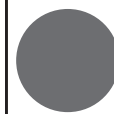

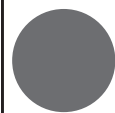

10

?

?

10

				
				

?

?

10

Draw counters to finish each picture so it shows 10.
Write how many counters of each color.

10

10

10

4 dogs are napping.

5 dogs are playing.

How many dogs are there in all?

Try It

Math Toolkit

• two-color counters 

Apply It

- 1** 4 dogs are napping.
6 dogs are playing.
How many dogs are there in all?

$$4 + 6 = \underline{\hspace{2cm}}$$

- 2** 7 dogs are running.
2 dogs are eating.
How many dogs are there in all?

$$7 + 2 = \underline{\hspace{2cm}}$$

Complete the equation.

Example

$$3 + 3 = \underline{6}$$

$$3 + 4 = \underline{\hspace{2cm}}$$

$$4 + 4 = \underline{\hspace{2cm}}$$

$$5 + 4 = \underline{\hspace{2cm}}$$

Compare each picture with the equation and count and write the total.

$$5 + 5 = \underline{\hspace{2cm}}$$

$$5 + 4 = \underline{\hspace{2cm}}$$

$$2 + 6 = \underline{\hspace{2cm}}$$

$$6 + 2 = \underline{\hspace{2cm}}$$

9 crayons are in a box.

Jon takes out 5 crayons.

How many crayons are still in the box?

Try It

Math Toolkit

• two-color counters 

Apply It

- 1** 10 crayons are in a box.
Jon takes out 4 crayons.
How many crayons are still in the box?

$$10 - 4 = \underline{\hspace{2cm}}$$

- 2** 9 pencils are on a desk.
Tucker takes 2 pencils.
How many pencils are left?

$$9 - 2 = \underline{\hspace{2cm}}$$

Complete the equation.

Example

$$6 - 1 = \underline{5}$$

$$9 - 4 = \underline{\quad}$$

$$8 - 2 = \underline{\quad}$$

$$9 - 5 = \underline{\quad}$$

Complete the equation.

$$7 - 4 = \underline{\hspace{2cm}}$$

$$8 - 3 = \underline{\hspace{2cm}}$$

$$7 - 3 = \underline{\hspace{2cm}}$$

$$8 - 4 = \underline{\hspace{2cm}}$$
