Maxim's Summer Autism Program offers a fun environment for children diagnosed with autism to build lasting skills and friendships. Lead by a Licensed Behavior Analyst, children will work in pairs with a Certified Behavior Technician receiving direct instruction specific to your child's needs using Applied Behavior Analysis (ABA) therapy. Our younger groups will focus more on pre-academic skills, social skills, and speech in a lively, playful environment. Our older groups will focus more on conversations, perspective taking, social skills and more through theater games and performance improv. Opportunities for parent involvement and instruction will be provided and encouraged.
